

Tell Our Governors: “Stop Elective Abortions!”

As America faces the Coronavirus outbreak, with business, schools and even churches shutting down, America’s abortion facilities continue to operate—sometimes in defiance of state directives.

By continuing to perform elective abortions, the abortion industry is causing further spread of the virus, as well as consuming medical supplies urgently needed to fight this outbreak.

To help stop the spread of Coronavirus and keep our communities safe, please take the following three steps:

First, call your governor and demand they instruct abortion facilities in your state to shut down:

SAY: “While businesses have been closed, abortion centers remain open in our state, continuing to perform elective surgeries putting ALL our lives at risk of COVID-19. I call on the governor to ACT NOW and close the abortion businesses before the deadly virus spreads further!”

ASK: “Is he/she going to protect us and issue the order to close the abortion businesses just as other businesses, schools, and churches have? To keep abortion businesses open is to put our lives at risk.”

Next, call the governors of other states using these same talking points, starting with those listed in **red** (with Republican governors, who are most likely to act), and then calling those in **blue** (Democrat governors who still need to hear from us).

If you’ve completed these three steps and are able to do more, contact the governors again using the email addresses provided at <http://protestpp.com/howto>

Alabama

Gov. Kay Ivey
334-242-7100
